E.B.U.

REVIEW

PART A - TECHNICAL

Published bimonthly by the Technical Centre of the European Broadcasting Union (E.B.U.)

INDEX OF CONTENTS

1965

Numbers 89 to 94
(February, April, June, August, October, December)

Editorial, Advertising and Publishing Office: 32, avenue Albert Lancaster, Brussels 18 (Belgium)

ARTICLES

AGRESTI M. and PINEIDER G.	Televising black-and-white film	94–245
BELGER E. and von RAUTENFELD F.	The objective measurement of the RF wanted-to-interfering signal ratio in amplitude-modulation sound broadcasting	90– 57
BELGER E. von RAUTENFELD F. and VOGT K.	The wanted-to-interfering signal ratio required with an interfering signal fluctuating in time, in amplitude-modulation sound broadcasting	90– 69
BILLARDON M.	The artistic balance between sound and music volumes in sound broadcasting	94–238
BRUNNER F.	Experimental television presentation suite	92–159
CLOUARD R.	The functions of the audio-frequency equipment of the O.R.T.F. Broadcasting House, Paris	91–107
DASNES A. and LARSEN F.	Transistorised limiting amplifiers	89– 20
GIUGLIARELLI G.	On the influence of oversea propagation on the transmission of colour-television signals	90– 54
GIUGLIARELLI G.	Some problems concerning the transmission of colour-television signals over radio-relay links	93–205
LARI G.	Measurement of modulation at the RAI Monitoring Station at Monza	93–209
LIEDTKE G.-R.	The effect of receiver characteristics and radiated bandwidth on the RF wanted-to-interfering signal ratio with amplitude-modulation sound broadcasting	90– 65
MERTENS H.	Directional hearing in stereophony — Theory and experimental verification	92–146
PINEIDER G. and ZACCARIAN P.	Television film-recording techniques	91– 98
RICOMMI A.	Eurovision and the Tokyo Olympic Games	89– 13
SAHARA T.	Broadcasting the XVIIIth Olympic Games, Tokyo 1964	89– 3
SCHÜRER J.	The use of a pilot-tone device for editing television tape recordings	89– 40
TEMPLE F.R.	Testing facilities in the B.B.C.'s Equipment Department	92–164
THEILE R.	The development of compatible colour television with particular reference to the different proposals for transmitting the chrominance signals	93–194

The numbers of the issues are printed in bold type and the page numbers in Roman type.

INTERNATIONAL NEWS

Calendar of international meetings dealing with sound and television broadcasting engineering 92–186; 93–229

I.T.U. : Centenary of the I.T.U. 90– 73
Reduction of the overcrowding on short waves 93–216

C.C.I.R. : Interim Meetings of C.C.I.R. Study Groups I, II, III, V, VI as well as the C.M.T.T. 92–169/173
Interim Meetings of C.C.I.R. Study Groups IV, VIII and IX . . 90– 73/ 75
Interim Meetings of C.C.I.R. Study Groups X and XI . . . 91–119/121
Propagation data obtained in radio-relay systems 94–258

I.F.R.B. : Procedure for settling questions of harmful interference 89– 24
Proposed changes in channels used for short-wave broadcasting 92–168; 93–216
Publication of service documents 92–168

I.E.C. : Meeting of Sub-Committee 29-A (Sound Recording) 93–215

C.I.S.P.R. : Meetings of C.I.S.P.R. Working Groups in Paris 91–117

Expansion of television in Western Europe during 1964 . . . . . 89– 46

The evolution of television 89– 42

Satellite telecommunications 91–141

" Pirate " broadcasting stations 89– 38; 91–134; 93–229

AUSTRIA

Ten years of television 94–271

BELGIUM

Progress with the new Brussels Broadcasting House 91–123
Fifth International Congress on Acoustics 89– 24

CANADA

Preparations for the 1967 World Exhibition 94–258
S.M.P.T.E. Conference 90– 77

FRANCE

Removal of the Perpignan VHF transmitting station 90– 78
Some problems posed by changing the location of a transmitter 94–259
Stereophonic transmissions 92–174
Extension of the Second Television Programme 89– 25; 90– 78; 92–174; 94–259
Television Centres 90– 78; 92–174; 93–217; 94–260
Live television programmes (Cordouan Lighthouse, Pierre Saint-Martin caves) . . 89– 25; 92–174
Television outside-broadcasting facilities 89– 25; 89– 26; 90– 77; 92–175
Commercial events 94–260

GERMANY (Federal Republic)

Sound Broadcasting

New long- and medium- wave transmitters 90– 79; 93–218; 94–260
Short-wave transmissions 91–124; 94–261
Stereophonic broadcasting 90– 79; 93–219; 94–261
Towers and aerial masts 90– 79; 91–125; 91–126; 92–178; 93–218
Sound broadcasting studios 89– 27; 91–124
The new Deutsche Welle receiving station 90– 80
Fifteen years of Radio Free Europe 93–222
Special programmes for foreign workers 89– 30

Television

New television transmitters 90– 79
The Second and the Third Television Programmes . . . 89– 27; 91–124; 93–220; 94–260
Towers and aerial masts 90– 79; 91–125; 91–126; 92–178; 93–218; 94–261
Television studios 89– 27; 91–124; 92–179; 93–219; 94–260
Electronic " drop-out " compensator for television tape reproduction 92–178
Hoist for camera dollies 92–179
Thermoplastic moulding for television scenery 93–221
Light OB vehicles for television 89– 28
Live television programmes (German Grand Prix car race, State visit of Queen Elizabeth II, Z.D.F. programme from an aircraft) 89– 29; 92–177; 93–220
Fire at the Saarbrücken television station 91–127

The Deutsche Bundespost's networks 94–260
The Berlin Broadcasting House 92–179
New building for the A.R.D. training school 91–126; 93–221
Extensions of the Raisting station 92–180
Special vehicles for transmitter maintenance in the mountains 92–179
Electronic music 89– 30
Receiver production - Scientific and commercial events 91–127; 92–180; 93–222
E.B.U. participation in the International Communication Exhibition (Munich) . . 92–180; 93–230

GERMANY (Eastern)

Short-wave transmissions 91–128
Stereophonic broadcasting in East Berlin 89– 30
Projected television tower for East Berlin 91–128

IRELAND

Developments in sound and television broadcasting 92–180

ITALY

Short-wave transmitting facilities 93–223
New television studio at Milan 94–261
Television outside-broadcast vehicles 93–222
Choice of tape-recording standards for monochrome television 92–181
Electronic compensation for " drop-outs " in televisision tape recording 91–128
Extension of the satellite Earth-station at Fucino. First television transmission to the U.S.A. 91–128; 93–223
RAI Monitoring station (Monza) : New tower - Measurements of modulation depth . 89– 30; 92–182
International Electronic, Nuclear, Broadcasting and Film Exhibition 92–182

JAPAN

Development of sound and television broadcasting 91–129
Automatic remote monitoring of unattended stations 94–263
The studio facilities of the Tokyo Broadcasting System 90– 84
New low-noise fluorescent-tube lamps 91–131
Automatic television tape editing apparatus 94–262
Live television from the summit of Fujiyama 90– 83

KENYA

Development of sound and television broadcasting 90– 84
The Voice of Kenya opens an engineering training school 94–264

MOROCCO

Development of television broadcasting 93–223

NETHERLANDS

Replacement of the Lopik medium-wave transmitters 94–264
Introduction of the Third Programme 94–264
A second Regional Headquarters in the North-east of the Netherlands 89– 31
An automatic process for recording the number of listeners and viewers 94–265
Exhibition of historical broadcasting equipment 94–265

PORTUGAL

Expansion of the television service 94–266

RHODESIA

Development in sound and television broadcasting 94–266

SPAIN

Reorganisation of medium-wave broadcasting 89– 33; 93–224
Television station in the Canary Islands 91–131

SWEDEN

Sveriges Radio's progress in 1964 . . . . . 90– 85
Digital bidirectional film-length indicator 89– 33

SWITZERLAND

Determination of the radiation pattern of an aerial by means of a helicopter 90– 85
Mobile television tape-recording units 93–224
German programmes for the Swiss wire-distribution service 93–225
International Television Symposium, Montreux 91–133

UNITED KINGDOM

Extension of the second B.B.C. television programme 89– 34; 94–267
Tubular stayed masts (Emley Moor, Winter Hill, Belmont) 92–183; 93–228
The London Telecommunication Tower 94–268
New studios opened at the B.B.C. London Television Centre 93–226; 93–227
A new multiple-control position at the B.B.C.'s External Services' Headquarters 90– 87
Transistorised sound outside-broadcasting equipment 94–268
The B.B.C.'s new London television outside-broadcast base. 91–133
The sound and television broadcast coverage for the State Funeral of Sir Winston Churchill . 89– 34

UNITED STATES OF AMERICA

New rules for medium-frequency broadcasting 89– 35
Polarisation of VHF/FM broadcast signals 90– 87
Stereophonic transmission by way of a satellite 89– 38
Study of sporadic-E propagation 92–185
New F.C.C. report on the loudness of broadcasts 94–269
Statistics of sound broadcasting and television receivers 89– 38; 91–134; 93–229

SOUND AND TELEVISION BROADCASTING STATIONS IN THE EUROPEAN AREA

Conditions in the long- and medium-wave spectrum :

at 1st January, 1965 . . . . . 89– 51
at 1st March, 1965 . . . . . 90– 94
at 1st May, 1965 (with a chart showing the situation in the spectrum) 91–140
at 1st July, 1965 92–185
at 1st September, 1965 93–235
at 1st November, 1965 (with a chart showing the situation in the spectrum) 94–270

Conditions in the Band-II spectrum (VHF/FM sound broadcasting) :

at 1st January, 1965 . . . . . 89– 51
at 1st March, 1965 . . . . . 90– 94
at 1st May, 1965 91–140
at 1st July, 1965 92–185
at 1st September, 1965 93–235
at 1st November, 1965 94–270

Conditions in the Bands I, III and IV/V spectrum (television broadcasting) :

at 1st January, 1965 . . . . . 89– 51
at 1st March, 1965 . . . . . 90– 94
at 1st May, 1965 91–140
at 1st July, 1965 92–185
at 1st September, 1965 93–235
at 1st November, 1965 94–270

SOME RECENT PUBLICATIONS AND NOTEWORTHY ARTICLES

Recent publications 91–139
Noteworthy articles 89– 47; 90– 88; 91–135; 92–187; 93–231; 94–276

E.B.U. ACTIVITIES

Message from the new President of the E.B.U. 89– 2

Technical Committee

Seventeenth meeting, Lugano, April, 1965 91–142

Bureau of the Technical Committee

Thirty-first meeting, Madrid, September, 1965 93–236

Working Parties

Working Party K (Television and sound broadcasting on VHF and UHF) :
London meeting, July, 1965 92–192
Working Party L (International television relays):
Mainz meeting, February, 1965 . . . . . 90– 94
Executive Group, Rome, September, 1965 93–235
Sound Sub-group, Paris, December, 1964 . . . . . 89– 51
London, October, 1965 94–284
Working Party M (Long-distance television transmission) :
Torino meeting, October, 1965 94–283
Working Party P (Collaboration with the C.I.S.P.R. and interference counter-measures) :
Brussels meeting, May, 1965 91–144
Working Party S (Stereophonic broadcasting) :
Hilversum meeting, February, 1965 . . . . . 90– 95
Ad-hoc Group on Colour Television :
Paris meeting, January, 1965 . . . . . 89– 52
Sub-group 1 (General characteristics) and Heads of Delegations, Hanover, June, 1965 . . . 92–191

Eurovision

Television transmissions via " Early Bird " 91–122
